APPLICATORS FOR SUPER GLUE

- > TIPS AND TUBES MAKE APPLYING SUPERGLUE EASIER
- > CHANGE A WORN TIP RATHER THAN DISCARD THE BOTTLE.
- > NARROW TUBES FOR THIN ZAP-CA, WIDER TIPS FOR ZAP-A-GAP.

HELPFUL HINTS:

Z-ENDS fit over the standard bottle ends of all ZAP glues. The tips of Z-ENDS can be cut back to deposit larger amounts of glue. Sometimes glue can build up on the outside of a Z-END, let it harden and it will pop right off leaving a clean open tip.

When using the Micro-Dropper tubing let the glue wick down through to the tube end, then gently squeeze the bottle to deliver a small drop of glue.

When using PAC-NEC09, if the steel tip becomes blocked, soak briefly in acetone or nail polish remover to soften the clog of dried glue and clear the tip. You can also melt stubborn clogs, by briefly heating the metal tip with a match, lighter or soldering iron to clear the tip. Use caution when working with open flame.

- > MIX AND DISCARD OR CLEANUP AND REUSE!
