ZAP-A-GAP CA+... OUR MOST POPULAR ALL PURPOSE SUPER GLUE!

ZAP-A-GAP (GREEN) MEDIUM CURE - ZAP-A-GAP CA+

ZAP-A-GAP is our most popular superglue! Medium viscosity gap filling formula allows approximately 7-10 seconds for part positioning and an average cure time of 20 seconds. Consistently works on almost all materials including oily metals and pitchy woods. Solves difficult to bond problems. Use with Zip Kicker to accelerate cure time.

APPLICATORS FOR SUPER GLUE

HELPFUL HINTS:

Z-ENDS fit over the standard bottle ends of all ZAP glues. The tips of Z-ENDS can be cut back to deposit larger amounts of glue. Sometimes glue can build up on the outside of a Z-END, let it harden and it will pop right off leaving a clean open tip.

When using the Micro-Dropper tubing let the glue wick down through to the tube end, then gently squeeze the bottle to deliver a small drop of glue.

When using PAC-NEC09, if the steel tip becomes blocked, soak briefly in acetone or nail polish remover to soften the clog of dried glue and clear the tip. You can also melt stubborn clogs, by briefly heating the metal tip with a match, lighter or soldering iron to clear the tip. Use caution when working with open flame.
